- Spanish - (Native)

ABOUT ME

I'm a Frontend Web Developer, using different technologies for creating UI and Web Applications applying the best practices both on design and funcionalities.

I recently joined a web development bootcamp where I learned and put into practice most of the latest and most used technologies specially for Front-End development.

I'm always open to keep learning whatever is needed for the projects I'm working on.

PERSONAL PROJECTS

Here you can check out a few of many projects I've done. You can check out all my projects from my website. (click on the project link to display)

- Aerolab Challenge
- Pokedex Api
- Rick & Morty Api
- Weather App
